

# Kim Carnes, The Universal Song

(Bill Cuomo/Kim Carnes/Dave Ellingson)

The neon sign lights up the room  
She lifts the shade to feel the night  
The universal song is playing again

And out across the boulevard  
The cafe racers find their mark  
Closes the door  
She going looking for romance

You find it on the radio  
You feel it in the air  
The universal song is everywhere  
You feel it in a heartbeat  
And everyone's the same  
The universal song is playing again

She sees his face across the street  
He turns his head and looks her way  
The universal song is playng again  
He lifts her up and whirls her round  
It's in the touch  
It's in the sound  
The universal song is starting to play

You find it on the radio  
You feel it in the air  
The universal song is everywhere  
You feel it in a heartbeat  
And everyone's the same  
The universal song is playing again

The neon sign lights up the room  
She lifts the shade to feel the night  
The universal song is playing again

And out across the boulevard  
The cafe racers find their mark  
Closes the door  
She going looking for romance
