

# Kim Carnes, Young Love

(Gary O'Commer)

Jenny loves John  
But he doesn't care  
Now that he loves another  
I know that he's been getting his share  
Sometimes want to tell her  
But I wouldn't dare  
And tonight when she calls  
She won't know that I'm there

Remember the nights  
The thing that we said  
And when we climbed in the back  
Love was driving me out of my head  
And I want to tell you  
May lightning strike me dead  
If he wasn't the best love I ever had

It was young love running wild  
It was young love, only young love  
Like a child, it was young love  
Young love, only young love  
Running wild and running free

Waiting for the night  
It falls in the street  
She's just a young girl learning  
Moving in, shaking at the knees  
Now don't say forever, just say what you need  
Love was never a stranger  
When he called on me

It was young love running wild  
It was young love, only young love  
Like a child, it was young love  
Young love, only young love  
Running wild and running free

Jenny loves John  
But he doesn't care  
Now that he loves another I know he's been getting his share  
Sometimes want to tell her  
But I wouldn't dare  
And tonight when she calls  
She won't know that I'm there

It was young love running wild  
It was young love, only young love  
Like a child, it was young love  
Young love, only young love  
Running wild and running free
