

Kim Richey, Those Words We Said

I left you with nothing but a few tears in my eyes
Now I'm halfway down the Interstate past Highway 99
It's just me and one good wiper blade up against the rain

CHORUS 1:

And I still hear the echoes of those bitter words we said
And I could drive a million miles and never drive them from my head
Those words we said
No matter how I try I can't get far enough away
Every sad song on my radio sounds like it's custom made
By some devil on my shoulder that keeps whisperin' in my ear

CHORUS 2:

And I still hear the echoes of those bitter words we said
And I could drive a million miles and never drive them from my head
Those words that wounded like an arrow to the heart

And keep me driving

Driving

(repeat chorus 1)

Those words we said

We said...
