

Kimbra, Save Me

I'm the accident waiting to happen, it's just a matter of time
Back of the car again wondering why I got so determined to say

'I lack the courage to take care of myself'
Well ain't that a turn on babe?
Turn this car around I need somebody
To hold me when the morning comes

Go on on and save me
I'm sinking in to my feelings
And i'm scared they're gonna drown my confidence
Go on and save me
I might look capable but I'm not
These days you're all that I've got

I'm the acrobat turning around inside of your circuitry mind
under the covers i don't wanna come out till you make me feel alive

I've got the money to take care of myself
But I spend my time on suffering
Just this time around I need your body
If only when the morning comes

Go on on and save me
I'm sinking in to my feelings
And i'm scared they're gonna drown my confidence
Go on and save me
I might look capable but I'm not
These days you're all that I've got
