

Klaatu, Dog Star

"Dog Star"
(Dee Long)

It really doesn't matter where you are,
You could be livin' on a distant star,
Just a long as you're feelin' right,
If you just use a little imagination,
And put your mind in a new situation,
You could be trippin' through the galaxy,
Lost in a dream, Just you and me.

CHORUS

You reach your arms, up to the sky,
And cast your love across the universe.
You're feelin' happy but you don't know why.
And we'll go dancin' on the distant dog star with you.

As we go travellin' through time and space,
And leave the earth to the human race,
On our approach to the dog star,
We can see the milky way bar,
On a planet in a new constellation,
We begin a great celebration,
We will sing and dance until the day,
For tomorrow is a week away.

REPEAT CHORUS

Step out on the floor, feel light on your feet,
Anti-gravity's on, can't sit in your seat,
You're so far from home, all at once you know,
You're not ready to go, you wanna stay here for the rest of your life.
Just as long as you're feelin' right
You could be happy on this fine night.
You could be trippin' through the galaxy.
Lost in a dream, just you and me.

REPEAT CHORUS
