## Kosheen, Chances

At first, it was clear
It was easy to see
'Till you're cursed and reversed
And you turned it on me
Like a book, like a cover
You were easy to read
Like a clock, like a mother
You were curious and free

Starred in a movie
That was all about me
You're twisted in the end
In other far away trip
Everybody's in the castle, faster sleep
Wake up, stupid beaulty
No time to be weak

You take chances with me [3x] You're less lealty

Underneath the covers that you wear on a sleeve Is a time and a place Everything that you live Trying to be clever Isn't pretty for me Suffocate in Ione and give me room to be Stopped in a movie that is all about me Deep in a picture than Skipping a dream I thought you said you never had the mesure for me Get up, it's time to leave

You take chances with me [3x] You're less lealty

(Loose your fizzy heart)

You take chances with me [2x]
