

# Kristy Thirsk, Hypnotized

(Thirsk)

I've been waiting twenty four seven  
I'd look to the sky and hope that my prayers got through  
I thought I saw an angel with ribbon  
Wrapping up love and writing my name down too  
And then I heard you fall  
I knew I had it all

In our eyes it's more than a little proof  
We're hypnotized, It's more than a little proof  
That you and I have more than a little  
It's more than a little, the way our love grew

I know I'm going to love you forever  
You fill up my veins, my soul and my heart's soaked through  
I know that we'll spend always together  
Even our journeys to heaven, we'll see it through  
'Cause when you hold my hand  
Then we both understand

In our eyes it's more than a little proof  
We're hypnotized, It's more than a little proof  
That you and I have more than a little  
It's more than a little, the way our love grew

You and I are learning fast  
How to make our true love last  
You and i are coming home, yes  
All our lives, we just stay hypnotised

In our eyes it's more than a little proof  
We're hypnotized, It's more than a little proof  
That you and I have more than a little  
It's more than a little, the way our love grew

In our eyes it's more than a little proof  
We're hypnotized, It's more than a little proof  
That you and I have more than a little  
It's more than a little, the way our love grew
