Krokus, We'll Rise

Dark was the night, tears on my face We gathered in the candlelight as the whole world stood still

How can I forget that prayer for the dead Underneath that blackened sky As close as we could get

It's the age we're livin' in A dark sign of the times Can't let the madness kick us down to the ground

We'll rise, we'll rise We'll shine in the night We'll rise, we'll shine from the ashes of eternity

We'll rise, we'll rise
We'll shine in the night
We'll rise, we'll shine to eternity

Another starry sky, another silver moon And soon the sun will shine warming our roofs

Gather your children We must move with the wind to make a fire bright from the flames within

We'll rise, we'll rise Like an eagle flies in the sky

'Cos together we're strong And we'll rise, we'll rise
