

# Kubb, Lady Nightmare

When she begins to radiate  
I know she'll bent me 'till I break  
So I treat her like a baby  
With a loaded gun

She won't let me touch her skin  
I stand beside her and breath her in  
It doesn't matter what you give it's never enough

She is a radiate Lady nightmare  
Brings me to my knees  
On a save day for Lady nightmare sends me off to sleep

Lalalala (gasping)

Her attentions fluctuates  
so my dimension compensates  
And I treat her to the winter lying in the sun  
I sit beside her and breath her in  
Feel the outline of her skin  
It doesn't matter what you give it's never enough

She is a lady  
Lady nightmare  
Brings me to my knees  
On a save day for Lady nightmare sends me off to sleep

She is a lady Lady Nightmare  
Brings me to my knees  
On a save day for Lady Nightmare sends me off to sleep

Lalalala (gasping)
