

Kudai, It's over

I can hear you say
that you cant pretend
tearing every illusions ours again
i dont wanna talk,
not even to work
this is just the last thing i never thought...
That you will be away from me
and someone else
just took your love away
Cause you and me its over,over
our love is gone
just empty places no sun, no fun
your thousand stars above me
everything is over our love is gone
When i look around
i can feel my heart
listen every moment by your side
how could i forget
the first day we met
wishing to belive in fairy tales
With you away
its just the end
this loneliness
just makes me wanna scape
Cause you and me its over,over
our love is gone
just empty places no sun no fun
your thousand stars above me
everything is over our love is gone
you and me its over,over
our love is gone
just empty places no sun, no fun
your thousand stars above me
everything is over our love is gone
i cant stop feeling,
i cant stop dreaming
about you baby
take me back
my love
your right here beside
me your kisses dont let me go...
