

Kylie Minogue, Golden

your face move just like a dancer
your soul beats just like a drum
tomorrow has all the answers
today says we've just begun

don't you feel the Sun on your face?
hopeful hearts of the human race
shining down from above

we're golden
burn like the stars
stay golden
straight from the heart
we're the voice that'll never give in
getting knocked down
back up again
we're golden. golden
that's who we are

live your life like you're standing
every little moment in time
infinity goes on forever
lay your life on the line

don't you feel the Sun on your face?
hopeful hearts of the human race
shining down from above

we're golden
burn like the stars
stay golden
straight from the heart
we're the voice that'll never give in
getting knocked down
back up again
we're golden. golden
that's who we are
