

La Men, My New N.Y.

City lights have gone and the dawn
Has won over night
The sun comes in your town now

People run, they hardly touch the ground
Some people dance
They dance their sense of life
The ritual of your home now

Ref.:
I've dreamed of house of glory
Now, I've got my part of story
I mean it's now my new New York
For it's now my new New York

Smiling face of John , now it's yours
An'you know what is right
The peace comes in your town now

People bring their songs
They echo in the park
They celebrate this fairy tale
And you know it's your own now

What you see in your up-town; what you feel in your down-town
