

# Lab Black, Wash It Away

Wash it in the sea let it soak all night  
Wash it in the sea let the saltwater wash it away  
Soak it in bleach till its white on white  
Soak it in bleach till the blood just washes away

Hang it in the wind let it blow all night  
Hang it up high, let the high wind blow it away  
Hang it in the wind let the sun burn bright  
Hang it in the wind till the blood just washes away

I have waited wasted years  
For the child that's come and gone today  
I wasted all this fear  
How can I just turn and wash it away  
If I can then I will wash it away  
If she can then she will wash it away  
If I can then I will wash it away  
If she can then she will wash it away

Forty years spent one by one  
Forty years of life just slipping away  
What I'd give for a firstborn son  
Forty years of blood just washing away

I have waited wasted lives  
I have waited long enough I'd say  
Say what about, what about, what about, what about  
How can I just turn and wash it away  
If I can then I will wash it away  
If she can then she will was it away  
If I can then I will wash it away  
If she can then she will was it away

So send me an angel  
Send me the ghost that I was  
Just send me an angel  
Send me the ghost that I was  
That I was, that I am. I will wash it away  
She will wash it away  
I will wash it away if I can then I will, I will and I will  
Yeah, yeah, yeah, yeah, hey yeah, yeah, yeah.  
Hey yeah, yeah. If I can then I will wash it away
