

# Lacey Sturm, Breathe With Me (feat. Lindsey Stirling)

How'd you end up on the ocean floor  
You can't hold your breath here anymore  
But Up on the surface where the sun burns us  
The light of the day sings come explore

Go take a deep breath of the open air  
And don't forget all you will learn there  
Cause back under water  
It only gets darker  
So burn in your memory  
The way to keep breathing

When Your sinking lower than you've ever been  
Keep fighting the current  
That lies within  
Cause between the waters and clear open skies  
Is a place that we pass through but not survive

Go take a deep breath of the open air  
And don't forget all you will learn there  
Cause back under water  
It only gets darker  
So burn in your memory  
The way to keep breathing

I'm Coming up for air  
You are almost there  
We are almost there  
I'm Coming up for air  
You are almost there  
We are almost there

Just Breathe with me  
Just Breathe with me  
Just Breathe with me  
Just Breathe with me  
Keep breathing  
Keep breathing

Go take a deep breath of the open air  
And don't forget all you will learn there  
Cause back under water  
It only gets darker  
So burn in your memory  
The way to breathe

Ohhh
