

Lake Of Tears, As Daylights Yields

Closed the door to the world below
Where demons sleeps and the evil grows
But when night falls, and shadows grow long
They'll enter through from the world of beyond

When darkness clouds, they'll ride from the other side

When the night comes, and daylight yields
They come to you, and haunt your dreams

Closed the door to the world down deep
Lost the key to where evil sleep
But the nightmare lands, there the candles light
The sing of evil that brings forth the night

As daylights yields, it brings forth the light
Around the cenotaph, now burns candle lights...

When the night comes, and daylight yields
They come to you, and haunt your dreams
When the night hides, and shadow are long
They come for you, and take you beyond
