

Lamb, Sun

Here you come again with the wind at your heels
The brightest thing I've seen for years and years

You are the sun
It's where you're from
And where I'm going to
The light you shine
Can always change
My grey skies into blue

You walk with the heat turned up and a fire in your eyes
Could feel you coming for miles and miles

You are the sun
It's where you're from
And where I'm going to
The light you shine
Can always change
My grey skies into blue

You are the sun
It's where you're from
And where I'm going to
The light you shine
Can always change
My grey skies into blue

You are the sun
It's where you're from
And where I'm going to
The light you shine
Can always change
My grey skies into blue
