

# Lamb, That Thing (Open Up)

The thing that makes  
Us all but same  
And melts the coldest heart  
We try to run  
And hide in vain  
But without love  
We'd fall apart

This world she knows  
Us all so well  
And wraps us in her arms  
There's a one thing keeps  
Us out of hell  
For without love we'd come to harm

Lalalalalala...

Did you ever question what it is  
We were put on this earth for  
The only thing I know is this  
That without love we'd be no more

Lalalalalala...

Open up and see  
All fear and pain are gone  
True possibility  
We're all one yeah

Lalalalalala...

Open up and see  
All fear and hatred are gone  
True possibility  
We're all one yeah

Open up and see  
All fear and hatred are gone  
True possibility  
We're all one yeah
