

Laurie Webb, Dance With Me

No I'll not soon forget
The way you came in
Unannounced
As though you read my mind
As if
I'd said it to you
Right out loud
Won't you dance with me? (the night will melt away)
Close as you want to be (near my energy)
Won't you dance with me? (the night will melt away)
Close as you want to be
You said it all with a smile
The way you offered your hand
We could have been talking Kierkegaard
Galileo's daughter, man on mars
But i never even heard a word
Won't you dance with me? (the night will melt away)
Close as you want to be (near my energy)
Won't you dance with me? (the night will melt away)
Close as you want to be
Won't you dance with me? (the night will melt away)
Close as you want to be (near my energy)
Won't you dance with me? (the night will melt away)
Close as you want to be
