## Led Zeppelin, Wearing And Tearing

It starts out like a murmur Then it grows like thunder Until it bursts inside of you Try to hold it steady Wait until you're ready Any second now will do Throw the door wide open Not a word is spoken Anything that you want to do

Ya know, ya know, ya know...

Don't you feel the same way? Don't you feel the same way? But you don't know what to do No time for hesitatin' Ain't no time for hesitatin' All you got to do is move They say you're feeling blue, well I just found a cure It's a thing you gotta do, yeah

Ya know, ya know, ya know...

Now listen: You say your body's aching? I know that it's aching Chill bumps come up on you Yeah, the funny fool I love the funny fool ?Just like foolin' after school? And then you ask for medication Who cares for medication When you've worn away the cure

Ya know, ya know, ya know... Go back to the country Yeah, go back to the country Feel a change is good for you When you keep convincin' Ah, don't keep convincin' What's that creeping up behind a you? It's just an old friend It's just an old friend And what's that he's got for you?

Ya know, ya know, ya know...

Do your dance do your dance do your dance Oooooh, medication. Medication! Medication!
