

Lee Roy Parnell, One Foot In Front Of The Other

Well love can be an uphill climb gonna meet a lot of resistance
It takes every ounce of strength we've got if we're gonna go the distance
We can get discouraged and lose our courage and worry bout the daily grind
But life's a journey no need to hurry it's one day at a time

One foot in front of the other take one step and then take another
Just keep on walkin' we're headed in the right direction
Puttin' one foot in front of the other little by little gets a whole lot further
Hittin' our stride one foot in front of the other

[piano]

What's down the road now we can't say and the road behind don't
But every mile along the way is just another mile together
Unconcerned about the twists and turns we're takin' it nice and slow
Safe and sound covering ground steady as she goes

One foot in front of the other...

[piano - guitar]

Yesterday is dead and gone and tomorrow takes care of itself
We just keep on keepin' on we ain't stumbled yet

One foot in front of the other...

Yeah hittin' our stride one foot in front of the other
