Legendary Jim Knopf, See The Rain Falling

You say your brother hurt you
You say that you hate him
Was it so hard what he did do
Do you really want him to blaim

You say nations are having war
You say that it's allright
Everywhere there are rising more
Is the only solution to fight

But the world still keeps on turning
Nobody knows what the future will be
Just see the rain falling
Falling down on you and me

You say this world is really bad
You say it's getting worse
Did you ever think about the fact
That's the fault of everyone else

It's our fate to keep it rolling
To take this world as seems to be
'cause it's the same rain falling
Falling down upon you and me
