

# Leona Naess, Boys Like You

Blue light  
Flashing in my heart tonight  
Telling me that I'm alright  
And will be for some time  
Leave me now  
Playing on the radio  
Leave me for the friends we know  
I will only break your heart  
Sundays I remember you  
With your sleepy eye shading pale blue

My baby's gone and everybody knows  
The fever hit me in my fingers and through  
my toes  
This baby's gone and boy you know it shows  
This baby's gone

Will I see you again  
When I knew you my heart was in bends  
And I know I never said goodbye  
But boys like you don't ever cry

Don't speak  
The smile is sliding down my cheek  
I only came here to get what I need  
White light blinding my way tonight  
Will you remember me like I was?

Baby's gone...

My baby's gone and everybody knows  
The fever hit me in my fingers and through  
my toes  
This baby's gone and boy you know it shows  
This baby's gone
