

# Lifehouse, Lifehouse

If I don't have you then my world would end  
If I don't have you then I would die  
If I don't have you then my world would end  
If I don't have you then I would die  
You see it's not always right to tell someone you love them  
You have to think twice before you say those three words  
Cause they can mean the world for that someone  
If you don't mean it then don't even bother to tell those three words  
If life looks hard then you need someone to love  
But if you don't have someone to run to you'll always be sad  
You need someone who helps you when times get rough  
And when you think that the end has come you can turn to that someone  
So if I don't have you then my world would end  
If I don't have you then I would die  
If I don't have you then my world would end  
If I don't have you then I would die  
You see it takes more than just thinking you love someone  
You need to have some strength to say those three words  
But if you don't mean them then don't even bother to say, "I love you"  
I don't know what I'll do if you're gone  
I think I would die and my world would end  
You're always by my side and I can't live one day without you in my life  
You give that strength to say those three words and I really mean them  
So I'll say to you  
If I don't have you then my world would end  
If I don't have you then I would die  
If I don't have you then my world would end  
If I don't have you then I would die  
Just listen I need you  
Don't walk away don't walk away  
I'll say those 3 words just those 3 words  
I really love you  
Oh I love you  
If I don't have you then my world would end  
If I don't have you then I would die  
If I don't have you then my world would end  
If I don't have you then I would die  
I love you...
