

# Lighthouse Family, What Could Be Better?

In the flow of life  
Keeping an eye on tomorrow  
I am happy half the time  
I know you're searching for a touch of feeling  
But you don't have the time  
I know inside there's a better weather  
And the world outside really doesn't matter  
This love inside is a gentle colour  
In the shade of our love  
It's a subtle matter

Somebody smile at me like the sun  
Somebody that smile at me  
What could be better?

If there's a pot of gold at the end of the rainbow  
I'll be there on time  
I've been let down before  
I got up off the floor  
It don't change my mind  
Cause I know inside there's a better weather  
And the world outside really doesn't matter  
This love inside is a gentle colour  
In the shade of our love  
It's a subtle matter

Somebody smile at me like the sun  
Somebody smile at me  
What could be better?

We found it could be done  
What could be better?  
There's nothing close  
We found it could be done  
What could be better?  
There's nothing close  
Nothing close.
