Lil Eddie, No tomorrow

All I wanna do is stay right here on the floor Get lost in the night And dance like there's no tomorrow Don't care about the sunrise Somebody please just hit the lights All I wanna do is dance like there's no tomorrow Today just wasn't my day Everyone's getting me so fed up I've gotta find a way I know what can make me feel better Stepping out in my best Looking hotter than ever Wherever the party is That's where I'll be in a second I'm so ready to move my body Forget about all my problems When I hear that song I'ma lose control Hey, here I go All I wanna do is stay right here on the floor Get lost in the night And dance like there's no tomorrow Don't care about the sunrise Somebody please just hit the lights All I wanna do is dance like there's no tomorrow I'm loving the atmosphere Feels like I'm floating in heaven The music's all in my ear Taking over me My heart's racing Feeling so Hollywood How I got everybody staring Their eyes are the cameras And I'm loving all the attention Get up, 'bout to move my body Forget about all my problems They're playing my song I'ma lose control Hey, here I go All I wanna do is stay right here on the floor Get lost in the night And dance like there's no tomorrow Don't care about the sunrise Somebody please just hit the lights All I wanna do is dance like there's no tomorrow Please DJ Don't say it's the last call Cause I know what it means And I don't want you to play no slow song I'm still building the nerve to talk to that guy Just give me another song and make it right All I wanna do is stay right here on the floor Get lost in the night And dance like there's no tomorrow Don't care about the sunrise Somebody please just hit the lights All I wanna do is dance like there's no tomorrow All I wanna do is stay right here on the floor Get lost in the night And dance like there's no tomorrow Don't care about the sunrise Somebody please just hit the lights All I wanna do is dance like there's no tomorrow
