

Lindsay Lohan, To Know Your Name

I know your name
But I won't tell
We must keep this secret well
Privacy's hard to find
Eyes are watching all the time

[Chorus:]
Everybody wants to know our love
Everybody talks about our love
Everybody wants to know your name
To know your name
Everybody needs to criticize
None of them are even in our lives
Everybody wants to know your name
To know your name

Cant get out cant get through
Need to be alone with you
Must escape or are we allowed no part of privacy

[Chorus]

Can the boys with the zoom give the girls just second
See the man that I love needs a little sweet attention
I don't want to seem harsh but this girl's under pressure
I can't go through losing love again

Boy I need to breathe just one breath
Walls are closing in so fast
Privacy is hard to find, eyes are watching all the time

[Chorus x2]
