

# Lindsay Lohan, Very Last Moment In Time

Time stops for no one and moves on unaware  
It's easy not to notice  
It's easy not to care  
Conversation circles  
There's money changing hands  
I've been standing in the middle  
I've been caught up in the spin  
But out of the confusion  
The static and the noise you got my attention  
And made me wanna live

[Chorus:]  
Live like it's the last moon rising  
Scream just like no one's there  
Lose all of my defenses  
Hold you touch you love, you like it's  
A very last moment in time

It seems like I woke up beneath a different sky  
And I'm drunk on what I'm seeing through these open eyes  
All the little ways you move me  
All the places you expose  
The illusion I held on to  
You've got me letting go

I just wanna stay here soaking up the rain  
Falling all around me wash the world away

[Chorus]

Let me feel you next to me  
Let me taste the breath you breathe  
Open up the space between us

[Chorus]
