

Lindsay Robins, Breakdown

Guess what
I got dirty chemistry
Know what
You spiked my drink and poisoned me
Back off
Unless you wanna see me bleed
Get off
That's what I need

I don't hear what you're saying
I can't hear anything
The guitar is too loud
It's making my head ring

Can't sleep can't see
Everytime I speak I'm stuttering
Can't breathe can't be
Everywhere I walk I'm stumbling
If a heart shatters does it make a sound
Or is it just your normal average
Everyday breakdown

(Breakdown)

Shut up
Am I your experiment
Messed up
Do you think it's permanent
Freaked out
Why am I a basket case
Tripped out
What a waste

I don't know what I'm saying
The walls are closing in
The sun is way too bright
It's making my head spin

Can't sleep can't see
Everytime I speak I'm stuttering
Can't breathe can't be
Everywhere I walk I'm stumbling
If a heart shatters does it make a sound
Or is it just your normal average
Everyday breakdown breakdown

Break down in to a million pieces
Breakdown curled up on the floor
Well at least i'm feeling something
Thank God I'm feeling something

Can't sleep can't see
Everytime I speak I'm stuttering
Can't breathe can't be
Everywhere I walk I'm stumbling
If a heart shatters does it make a sound
If a heart shatters does it make a sound
Or is it just your normal average
Everyday breakdown breakdown
