

Ling Kai, Distraction

Go on take a little piece of me now go on
And chew it all up and spit it out
Once you're done
Everyone has a story to tell
When you're through I'll tell you mine If you'd shut up enough to listen

Sometimes I wanna be alone
I'm used to dinner on my own
But you came and shattered the silence baby

But do I even look like her
A distraction from the past
Rebound on rewind
I've done this before
Should I tell you again what happened
I can only love the one I know how to love
You can use me
But I can't say the same for me
So we go

Go on take a look at ourselves
I won't learn
How to put it out or cut you down now
Sometimes I wanna be alone
I pushed your number on the phone
And hang up once you're there

But do you even look like him
A distraction from the past
Rebound on rewind
I've done this before
Should I tell you again what happened
I can only love the one I know how to love
You can use me
But I can't say the same for me
So we go

But do you even look like him
A distraction from the past
Rebound on rewind
I've done this before
Should I tell you again what happened
I can only love the one I know how to love
You can use me
But I can't say the same for me
So we go
