## Lisa Marie Presley, Excuse Me (Hidden Track)

It's finally winter and I'm so happy I do better in the cold I like the friends who don't try to save me I've been trying that too long

What did I just say can you tell me Sorry I do that a lot Did you know I broke up my family And the guilt is never gone

Mister did you Say something to me Were you there this whole time Please excuse me

You know there's some who really hate me Hey you know that's a unique dog You have a nice smile want some candy Some people say that I have too much

I had a good feeling when I woke up

But I missed it 'cause I was sleeping Did you know I broke up my family Oh the guilt it's really killing me

Mister did you Say something to me Were you there that whole time Please excuse me

Mister did you Say something to me And were you there that whole time Excuse me

Mister did you Say something to me And were you there that whole time Well please excuse me Forgive me
