

LP, Love Song

My mortal enemies
Are still my fantasies
They get the best of me and turn me from a friend to fiend
It's such a tragedy because I wanna be
Back in that time when every melody was you and me

Gimme a love song
The words we used to sing before it went wrong
Gimme a love song
And I belong again
I belong, I belong to when we used to get along

Gimme a love song
Gimme a love song
Gimme a love song
Gimme a love song

I find my way to you no matter what I do
You're in my car you're in my head you're in my attitude
And so suddenly
You're singing back to me
I'm dancing to a beat I know

Gimme a love song
The ones we used to sing before it went wrong
Gimme a love song
And I belong again
I belong
I belong to when we used to get along

Gimme a love song
Gimme a love song
Gimme a love song
Gimme a love song
Gimme a love song
Gimme a love song
