

# Lucky 7, Where Are You?

What happened to the girl that I once knew  
what happened to the eyes I once stared into  
no I've never been the same since that day that I first met you

What happened to the special place we shared  
and all those promises we made there  
no I've never been the same since the day that I first met you

Where are you?  
You're not in my life  
stuck in my heart  
still in my mind

Well times have changed  
I guess so have you  
about time I realize  
I've said these words five hundred times  
I can't get you out of my mind
