

Lunarsea, Pro Nebula Nova

resolution is dragging me down, here I fell as a little pawn,
tracking down a faint pulsation, homologue of fluke, and now...

stop... stop at the boost speed,
in front of your footstep a plasma stands
beat, beat to sphereship.
in front of your footstep, something squirms

something squirms over there, something is calling
something that isn't someone

shell shock, so the nebula nova upsets planets around
Shell shock, it illuminates galaxies ever found
for the eagle and the horse, towards the chaos
the pillars far and gone, sometimes is calling me

brilliant petals are opening, protective panels from the glow
anesthetic mixture and shining first dose
it or he weaves,
in front of your footstep, some plasma stands
in front of your footstep, it or he weaves

something squirms over there, something is calling
something that isn't someone

shell shock, so the nebula nova upsets planets around
Shell shock, it illuminates galaxies ever found
for the eagle and the horse, towards the chaos
the pillars far and gone, sometimes is calling me

let me flow in a perfect gale, dazzling surprise

Solo: Fabiano Romagnoli
