

Lune, Leave The World Behind (ft. Swedish House

Leave the world behind you
And leave this world behind
Leave the world behind you
You got to leave this world behind

People can you hear me?
Here's a message that i'm sending out
I got the answer to all your problems,
And tonight i'll be singing it loud
Just surrender yourself to the rythem
Wave your hands up in the sky
Feel the energy's that inside your system,
And leave this world behind

Leave the world behind you
Leave the world behind you
Leave the world behind you
And leave this world behind
Leave the world behind you
Leave the world behind you
Leave the world behind you
You got to Leave the world behind

People can you hear me?
Here's a message that i'm sending now
Just surrender yourself to the rythem
Wave your hands up in the sky
Feell the energy's deep inside your system,
And leave this world behind

Leave this world behind
Leave the world behind you
Leave the world behind you
And Leave the world behind
Leave the world behind you
Leave the world behind you
Leave the world behind you
And Leave the world behind
