Luther Vandross, Think About You

So close to paradise, but closer than I should be

Its like Im along for the ride, it happened unexpectedly

Promised myself that I wouldnt ever love again

But you make me feel something, my minds always on you

I was standing in the rain (I thought about you)

I was riding on the train (I thought about you)

Feeling high like I seem to do Every time I think about you

Saw two lovers start to kiss (I thought about you)

Had to hold back the tears (I thought about you)

Other girls no more exist

All because I think about you

Nothing seems to help, I dont even know myself

Im trying not to think of you, but a heart does what it wants to do

Pass you by, see you smile and I must admit I get

So emotional, I think Im falling for you

Bought a pillow for my room (I thought about you)

Heard Alicia sing a tune (I thought about you)

It sends my rocket to the moon

Every time I think about you

Right from this heart of mine (I thought about you)

I wanted you every time (I thought about you)

What I feel is so divine

And its all because I think about you

But Im constantly reminded

Reminded that youre only someone who Id like to know

You dont know me, youre my private fantasy

Youre with me, constantly in my mind

Had a lovely day today (I thought about you)

Wasnt hard to get through (I thought about you)

Seems to happen easily

Every time I think about you

Took a walk with myself (I thought about you)

Wish it couldve been with you (I thought about you)

But every star in the sky came out for me

And its all because I think about you
