

Madasun, Feel Good

Woke up this morning
Heard the rain beating down outside
Fed up and lonely
They were playing on my mind

Took my umbrella
And I went walking down my street
Must have looked worried
'Coz a stranger turned around and said to me
(It'll be alright) and

Chorus
Don't it make you feel good
When the sun comes after the rain
Don't it make you feel good
When a chance you lost comes round again
When it doesn't feel right
Well there's something you should know
Behind every cloud there's a sun waiting to show
Don't it feel good

Strange things are happening
Every time you turn around
You get the feeling
You get up just to fall down
No use in complaining
You know it's true deep inside
But what happened to you
Anything that's worth having is worth the fight
You know it's worth the fight

Chorus

It's the trials you overcome
Is the fear you faced and won
The victories that make you grow strong

Chorus

And don't it make you feel good
When it doesn't feel right
Behind every cloud there's a sun waiting to show
Don't it feel good
