## Magica, Energy For The Gods

Still I live my life in a shade of a mystery All I know proves false and vain All the science learned All the knowledge is for nothing But a truth you can't explain

Feed on me, I've got Fuel for ages That you, you will steal against all odds Feed on me, and then Then close the cages We are, we are just energy for the gods

You still search and wonder Are we alone among the stars In this terrible waste of space? But you can't imagine That we're a harvest since forever Just a herd called human race

Energy for the gods That call me Energy, energy for the gods Energy for the gods That made me Energy, energy for the Gods
