

Malibu Stacy, Saturday Night Fisher

Early morning
Have a look at your clock
It's great to be there
It's all that much

You just have to be there
You won't have to talk
With smiles upon your face
Everyone will love you

Such a feeling
Coming 'roud
You think you're special
It's all that much

You just have to be there
You won't have to talk
With smiles upon your face
Everyone will love you

You'll like my spells, like no one else
You think you're sensual
You might wanna dance
Why can't there be love intentions ?
Why can't there be no one else but...?
You think you're special
We all like blue
You look like your brother
You might wanna dance
Why can't there be love intentions ?
Why can't there be no one else but you ?

I keep trying
I'm in love
You keep going
It's all around the world and...

You just have to be there
You won't have to talk
With smiles upon your face
Everyone will love you

You'll like my spells, like no one else
You know you're sensual
You might wanna dance
Why can't there be love intentions ?
Why can't there be no one else but...?
You think you're special
We all like blue
You look like your brother
You might wanna dance
Why can't there be love intentions ?
Why can't there be no one else but you ?

You'll like my spells, like no one else
You think you're sensual
You might wanna dance
Why can't there be love intentions ?
Why can't there be no one else but...?
You think you're special
We all like you
You look like your brother
You might wanna dance
Why can't there be love intentions ?

Why can't there be no one else but you ?
