## Manchester Orchestra, Virgin

Heard don't move unless you know someone you can move And I bruise just like anyone would bruise And I know we've got a long way to go I know I've got so far

We built this house with our hands, and our time, and our blood You build this up in one day to fall downward and rust You built this house with your hands, and your time, and your blood We built this up in one day to fall downward and rust

I'm gone

You tried to emphasize and side with both your ghosts In time I swore I'd take the straight and narrow path but still won't I hold his ear I'm only trying to do my job tonight Kiss him on top his lips and crucify the fire
