

# Manchester Orchestra, Wolves At Night

I could of sworn that I saw you knee bent on the bedside,  
Arms stretched like a kite that time will eventually grow.

I'm so sure of it

And I've got a reason, too long, for songs  
That tells why your legs and arms are actually able.

Cause I confide in wolves at night

have you seen my baby girl, she's lonely.

I've got to crucify myself if I am gonna believe you

I've got to promise that I'll finish all the things I said I'd do to begin with too

I've got to make my bed if I am gonna lay with you

Cause a disaster's a disaster no matter what Christian language you drag it through

Cause I confide in wolves at night

Well have you seen my baby girl, she's lonely, so lonely

Cause I confide in wolves at night

I'm like a virgin losing a child, so lonely, so lonely

I swear I did what I could for your rights,

You swear you did what you could for my eyes

And I'll try nothing, try something, try anything

I swear I did what I could for your rights,

You swear you did what you could for my eyes

And I'll try something, for nothing, for something.

Something

I swear I did what I could for your rights,

You swear you did what you could for my eyes

And I'll try something, try nothing, try anything.
