

Mandy Moore, Found You

Found You

You set my soul free,
I cant believe its true
That you wanna be with me,
I know you do
Finally I can see
Im no longer confused
I this has to be right
Youre the pieces Ive been missing all my life,

Chorus

But now I finally found you,
Im going to be with you forever
You faded away all my blue
Like 10,000 lights shinning together
Every since I saw your face
All my gray was chased away
Thank god I found you

Still hard to believe
That you are with me
Like a fantasy
That finally came to be
I would do anything
To keep right where you are

Chorus

But now I finally found you,
Im going to be with you forever
You faded away all my blue
Like 10,000 lights shinning together
Every since I saw your face
All my gray was chased away
Thank god I found you

I count my blessing
And pray every night
No more stressing
No more fights
I finally found peace
A cure from this disease
Is this reality
Or this all but a dream

Chorus

But now I finally found you,
Im going to be with you forever
You faded away all my blue
Like 10,000 lights shinning together
Every since I saw your face
All my gray was chased away
Thank god I found you
