Manowar, Carry On

The north star always guides me When winter skies are gray And I wait for the sun when all ate one I shall not betray Calling at me I'm waiting when all are led astray

Carry On my sons forever Carry On when I am gone Carry On for when the day is long Forever Carry On For as long as we together Then forever Carry On

Darkness all around us We don't close our eyes No one's gonna ground us We were born to fly Comin' at us no stopping Born to amplify

Carry On my sons forever Carry On when I am gone Carry On for when the day is long Forever Carry On For as long as we together Then forever Carry On

Yea, be my brother Fight to stay alive All the world can't change us With all their burned-out jive Come get us now we're waiting We won't ride and hide

Carry On my sons forever Carry On when I am gone Carry On for when the day is long Forever Carry On For as long as we together Then forever Carry On

Now we're all together Let's sing a fighting song One hundred thousand riders We can't all be wrong Comin' at us no stopping Always Carry On

Carry On my sons forever Carry On when I am gone Carry On for when the day is long Forever Carry On For as long as we together Then forever Carry On
