

# Mansun, When The Wind Blows

Wireless tells us all  
Looks like there's a war  
Both of us been through this before dear  
Put on our gas masks and pray dear  
But at least we've got each other

I'll still love you when the wind blows through  
I've been through this before  
I'll still love you when the wind  
When the wind blows through

Outside all is cold  
It looks like there's no war  
But my hair's falling out at it's root dear  
Things will blow over any day dear  
And at least we've got each other
