## Maps, To The Sky

My memory Feels like it's playing with me These things I know Yeah I know

The sun will end with you Need help to cut on through Can only feel this way When silence comes

I can sing it to the sky
There's a risk it won't reply
If I could change it, man, I would
And I won't screw it up this time

Been here before It won't happen no more These things I know Yeah I know

They get into your mind I guess you know the signs Can only feel this way When silence comes

(4x)
I can sing it to the sky
There's a risk it won't reply
If I could change it, man, I would
And I won't screw it up this time
