

Marc Almond, Lights

Walking down the street
Taking in the sights and pleasures
Sometimes it feels so good to be alive
From theatre to bar
From cabaret to car
I forget to cry
Forget the reasons why

Lights

City lights

In my head

Blue and red

In my eyes

Make me spin

Help forget the pain I'm in

Lights

City lights

Make me dream

Of other nights

In my eyes

Make me spin

Helps me forget everything

Out in the lights

Disco tears

Chandeliers

Laser beams

And broken dreams

Out in the lights

Disco tears

Chandeliers

Laser beams

And broken dreams

Kicking up my step

Even when it's rainy weather

Sometimes it's even good

To feel the rain

As a night club calls me in

I let go of everything

I forget the past

The past's not gonna last

Lights

Flashing lights

In my head

Blue and red

In my eyes

Make me spin

Help forget the pain I'm in

Lights

Flashing lights

Make me dream

Of other nights

Laser beams

Mirror ball

Help me to forget it all

Glitter on my pillow

And a longing in my heart

When the night is over

Wishing I was in your arms

Though it's just imagination

That plays tricks of the mind

When I'm out in the lights

I leave all my tears behind

Behind

I leave all my tears behind

I leave all my tears behind

Out in the lights
I leave all my tears behind
Out in the lights
Out in the lights
Lights
City lights
In my head
Blue and red
In my eyes
Make me spin
Help forget the pain I'm in
Lights
Flashing lights
Make me dream
Of other nights
In my eyes
Make me spin
Help me forget everything
I'm dancing through my tears
I'm dancing while I cry
Out in the lights
I leave all my tears behind
Mirrors in my eyes
Dazzle in my mind
Blinded by the mirror ball
I can forget it all
Stars are in the sky
Colours pass me by
When the spotlight's on
All my troubles gone
