

Margot and The Nuclear So and So's, Skeleton K

I did a sick sick thing to my love
My lack of loyalty it swallowed her up
And she cooked me food
She squirmed and turned
Like a skeleton key
She'd left her man unattended to me
And don't call me that
And don't claim you love me
Cause you know that its true
My entire affliction I'll attribute to you
And you're finally free
To twist and turn
Like a skelletion key
You've gotta let me know
You've gotta let me know
I did a horrible thing to that girl
I bred my misery and drowned it in her
And she got me high
And I hardly noticed there were tears in her eyes.
And I miss you less and less everyday
It's true the whisky's helped to wash you away
And it's clear to see
You're nothing special
You're a skelletion key
You've gotta let me know
You've gotta let me know
You've gotta let me know
You've gotta let me know
