Marilyn Manson, Devour

III swallow up all of you like a big bottle of big, big pills Youre the one that I should never take but I cant sleep until I devour you. I cant sleep until I devour you. Youre a flower thats withering. I cant feel your thorns in my hand. This is no embrace, your buried deep Youre not crying, this is blood all over me and III love you, if you let me and III love you, if you wont make me stop I used to hold your haunted neck. I know III miss you if I close my eyes but this is loaded if I open them Ill see you and Ill blow your heart to pieces I will blow your heart to pieces I will blow your heart to pieces I will blow your heart to pieces and III love you, if you let me and III love you, if you wont make me stop My pain is not ashamed to repeat itself I cant sleep until I devour you and III love you, if you let me and III love you, if you wont make me stop.
