

Martika, Alibis

This has got to stop
I am not gonna put up with this any more
So tell me what's your excuse this time
No never mind I don't wanna hear it

So many times you pushed me aside
I'm getting sick and tired of your alibis
All alone sleepless nights
Trying to pretend our love would be alright

I could've changed my mind
If you cared enough to just apologize
But now it's much too late
Your license to my heart has met it's expiration date

Alibis
Tell me no lies
I don't wanna listen to the reasons why
Alibis
Don't act surprised
When I walk away from you and
All your alibis

You gave to me a little teddy bear
To keep me company the nights you were not there
wanting to say baby please stay
Now I don't wanna deal with all the games you play

I gave you all I had
But now I know that loving me was just a fad
There's nothing more to take
If love is just a test then you're my big mistake
