

# Matt Wertz, Over You

It's been 10 months since July seven  
You closed the door, I left it open  
Holding out for what might be someday  
so you lingered, I took you with me  
through the country, every city  
Thinking I'd be better off this way

CHORUS:

I guess I don't wanna get over you  
I've tried it a thousand times  
It don't matter what I do  
I guess I don't wanna get over you  
I can't get you off my mind  
I thought it was time you knew  
So bittersweet I still remember  
Every part of your phone number  
Tempted, you're just 10 digits away  
I've gotta tell you, go down firing  
leave the darkness, cease the striving  
Knowing that i&quot;ll never be the same

BRIDGE:

It's so hard to let you go  
With all the spaces you still roam  
You're everything in between
