Mc5, Sister Anne

Sister Anne don't give a damn about evolution She's a liberated woman, she's got her solution Like a dinosaur, she's going off the wall She's gonna make it her own crusade She's got a heart of gold, gonna save a bitch's soul From goin' down Satan's hot way She can I know she can I know she can She's my Sister Anne

Such truth, such beauty, such purity
She wears a halo around her head
She's got the Ten Commandments tattooed on her arm
If she died she'd rise up from the dead
She's every man saviour and Mama too
If you do it she said she'll save hell from you
She can I know she can
I know she can
She's my Sister Anne

Sister won't you tell me where I went so wrong I used to say my prayers baby all night long I'd listen to the Gospel ringing in my ears Come on Sister Anne save me from my fears if you can I know you can I know you can You're my Sister Anne

After Sunday school Mass she goes to see her man She always does the best that she can She never tries to tease, she always aims to please She's gonna squeeze you tight and make you feel alright Cause she can I know she can I know she can She's my Sister Anne

She's my Sister Anne She's my Sister Anne . . .
